WonderHome

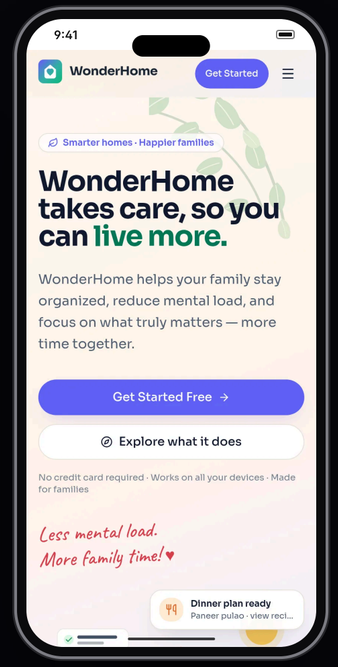

CONSUMER · FAMILY AI

WonderHome takes care, so you can live more.

An AI household operating system that manages the management — so families spend less time coordinating and more time together.

Investor overview · Live product · early households onboarding

The management of life can consume the life itself.

1. Family admin never ends, and it lands on one person.
2. Every tool adds another list to feed; none notices what is slipping.
3. A bill is noticed when it is overdue. Dinner is a question at 7 pm.
4. Families won't hand a home to software that acts without asking.

It manages the management.

01

Outcomes, not chores

Plans backwards from ‘dinner by 8’ or ‘bill paid in time’.

02

Asks before it acts

Every consequential step shows a plan: Confirm, Change or Cancel.

03

Reads the paperwork

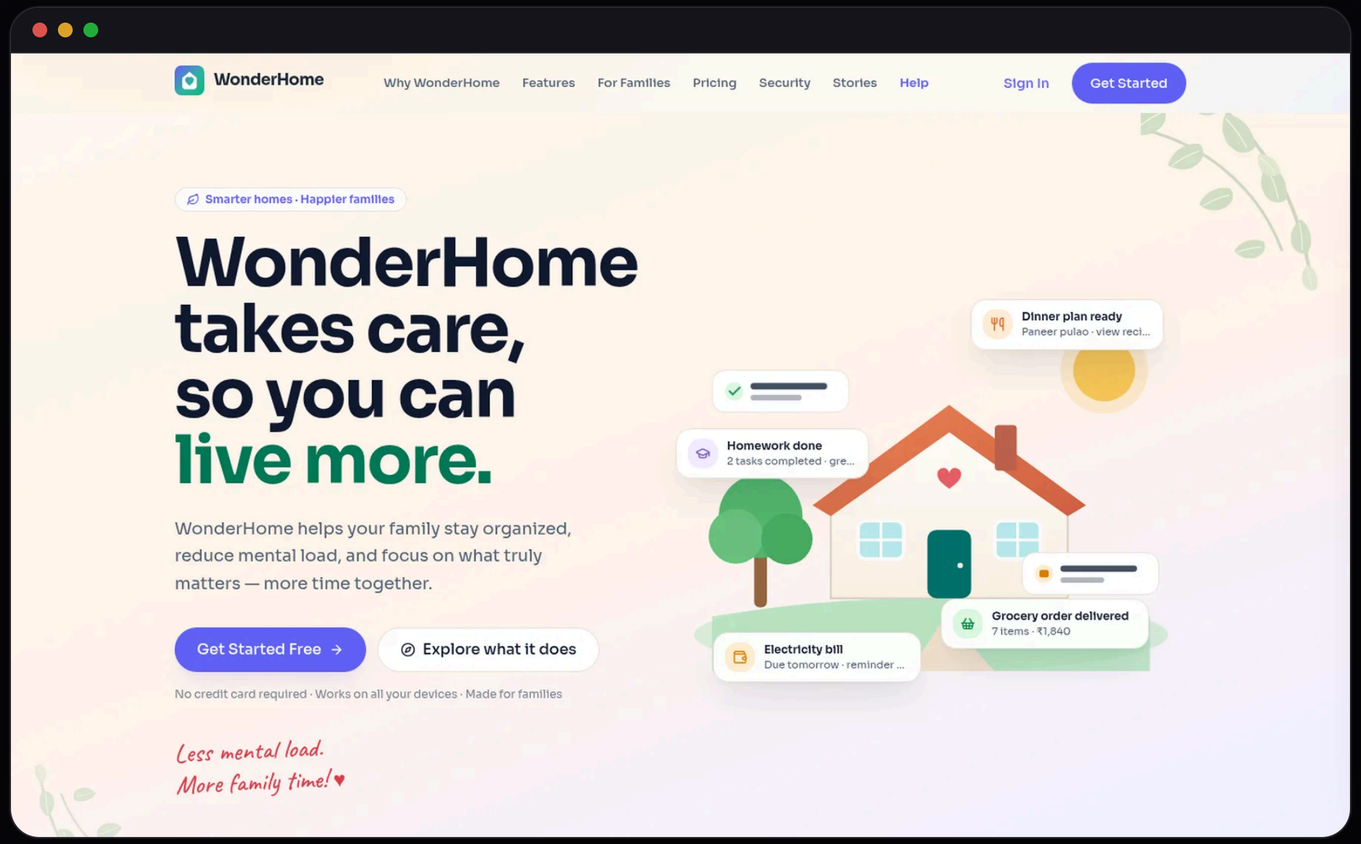

Send a school circular; each date, fee and item becomes a tracked entry.

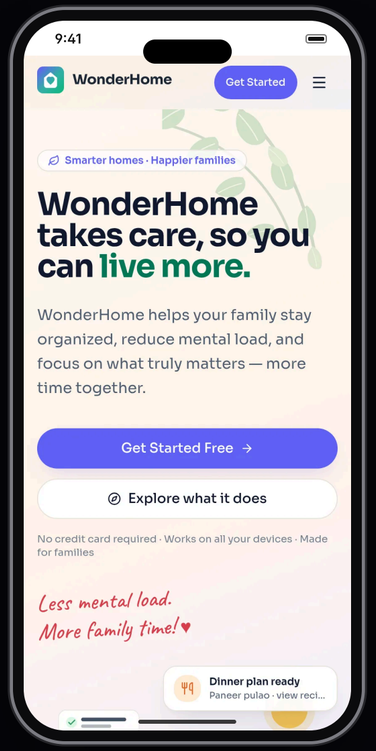

04

The whole household

School, meals, bills, health, help and pets in one place, by text or voice, in eight languages.

WonderHome, live today

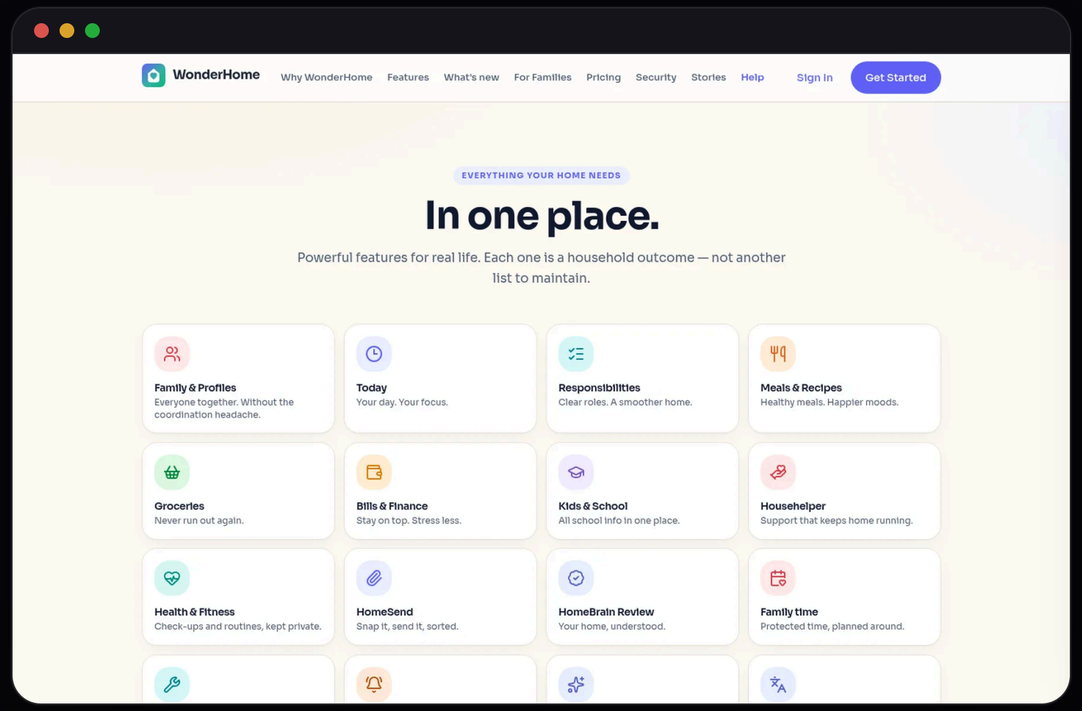

LIVE PRODUCT

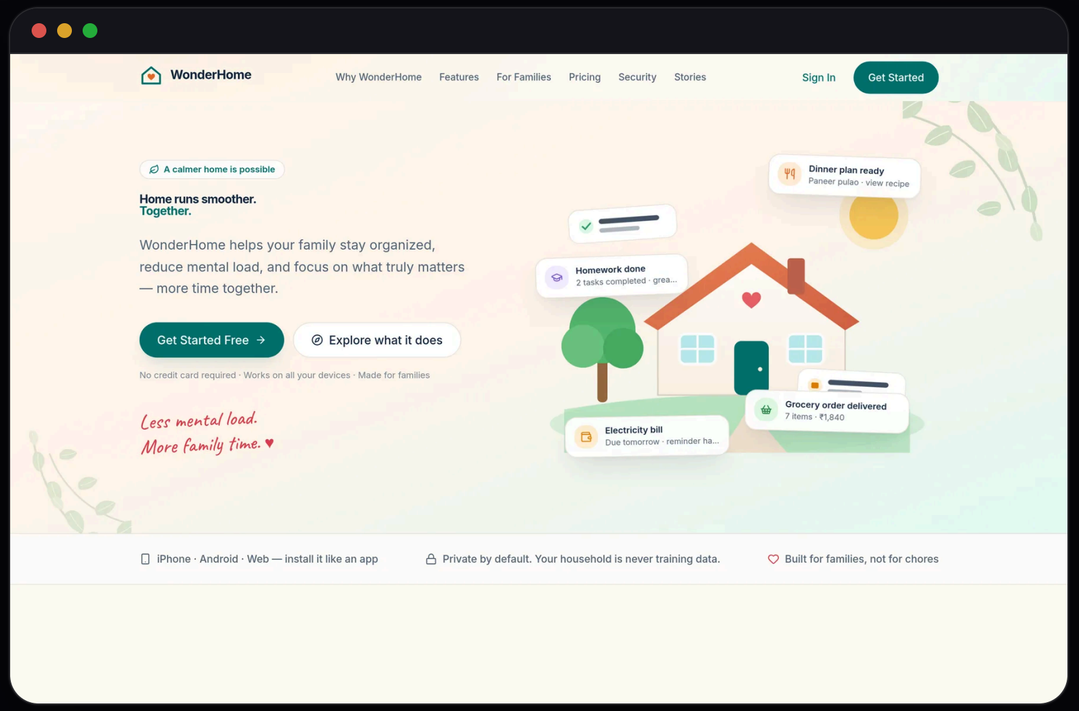

The product site — same design language as the app

home.wonderapps.biz

A closer look

Sixteen features, each a household outcome

Private by default — security as a family feature

From first touch to outcome

1

Observe

Calendars, school notices and the family's own words.

2

Understand & plan

Outcomes are checked against time, people and stock.

3

Act with consent

Routine work resolves quietly; anything big returns as a plan.

4

Monitor & learn

Sparse, threaded notifications shaped by household preferences.

Every family is a household to run.

$16.29B

Global AI assistant market, 2024, forecast $73.80B by 2033 at 18.8% CAGR

The closest defensible software category to WonderHome, with the publisher citing consumer demand for personalized, hands-free experiences as a driver.

Source: Grand View Research, 2025

Base year 2024, CAGR 2025–2033. Covers consumer and enterprise assistants; publishers scope this market very differently.

20.0 crore

Women in employment in India (aged 15+), Jan-Dec 2025

Working women are the core of the time-poor buyer pool: 20.0 crore (200 million) women were employed in 2025.

Source: MoSPI / NSO (Periodic Labour Force Survey Annual Report 2025), 2026

Usual-status employment, calendar 2025. 1 crore = 10 million.

85.5%

Indian households with at least one smartphone (urban: 91.3%), early 2025

Nearly nine in ten Indian households already have a smartphone, and 86.3% have internet at home, so a text or voice assistant needs no new hardware.

Source: MoSPI / NSO (Comprehensive Modular Survey: Telecom, 2025, NSS 80th round), 2025

Survey of 34,950 households, January–March 2025. Urban households: 91.3%.

More on the opportunity

305 min/day

Time women aged 15-59 spend daily on unpaid domestic services (India, 2024)

Indian women in prime working age spend about five hours a day on unpaid household work; the NSO says this is down from 315 minutes in 2019.

Source: MoSPI / NSO (Time Use Survey 2024), 2025

Per participant aged 15–59 in unpaid domestic services; down from 315 minutes in 2019.

Over 50%

Online adults in metro India who use generative AI, highest in Asia Pacific

Forrester finds metro India leads APAC on generative-AI use, and only 5% of metro Indians say they are not knowledgeable about AI.

Source: Forrester, 2025

Forrester gives “over half”, not an exact percentage. Sample is online adults in metro India.

3.73 crore

Overseas Indians (NRIs plus persons of Indian origin), as of January 2026: 37,280,845

MEA counts about 37.3 million Indians abroad (17.76M NRIs and 19.52M PIOs), the expat/NRI side of the buyer base.

Source: Ministry of External Affairs, Government of India, 2026

NRIs 17.76 million plus persons of Indian origin 19.52 million, as of January 2026.

What has changed

01 Assistants that can plan and act — not just answer — became reliable enough to run background loops in 2025–26.

02 Household commerce, school portals and calendars all now have programmatic surfaces to observe and act on.

03 Consumer trust hinges on consent-first design; WonderHome's governed-tool architecture is built for exactly that.

04 Voice assistants (Gemini Live, Alexa) and WhatsApp are wired to the same governed gateway and switch on the moment a household connects one — the scoped, revocable grant a household will actually trust.

WHO BUYS

- Urban dual-income families with school-age children
- Multi-generational households coordinating help and care
- Expat and NRI families running homes across time zones

Consumer subscription with billing built end-to-end.

Three plans — Free, Pro and Max — with real prices set (Pro ₹299/month, Max ₹599/month). Billing for India and international customers, with refunds, is built and switches on when payments go live; every plan is free during early access until then.

Free

Run the Home

- Household basics with WonderHome watching quietly
- Outcomes, routines, notifications
- Maintenance, laundry, pet care
- Text conversation and background runs

Pro

Let WonderHome Think

- The full household: school, commerce, meals, bills, family time
- Voice conversation
- School and homework intelligence
- Ordering and groceries

Max

Let WonderHome Run the Home

- Everything, with autonomous action
- Deeper integrations
- Highest usage limits

Built and verifiable

Read from the product's own public engineering tracker and live site. Code, trackers and demos are available to serious parties on request.

STORIES SHIPPED

224 / 226

99% of a 24-module backlog, per the live tracker; 1 still open and 1 deliberately deferred

MODULES COMPLETE

23 of 24

Voice release gates need a real Alexa and Gemini Live run; right-to-left layouts are deferred

LANGUAGES

8

English, Hindi, Marathi, Spanish, French, German, Arabic and Mandarin across every screen and HomeTalk

BILLING & PAYMENTS

India + international

Checkout, refunds and reconciliation built; free during early access until payments go live

What compounds

01

Consent architecture

Deterministic policy sits outside the model, set per household and per responsibility.

02

A private household graph

People, guardianship, stock, obligations and preferences compound into a model of one home.

03

Governed voice

One conversation contract across channels; payments, orders and health changes never ride on voice alone.

What comes next

NOW

- Turn on WhatsApp, Alexa and Gemini voice as each account is connected
- Voice release gates: a real Alexa and Gemini Live end-to-end run
- Activate payments as plans go live

NEXT

- First partners on the developer platform (scoped keys and a sandbox are built)
- Right-to-left layouts on the remaining screens
- Forwarded-email intake once a receiving domain is set up

LATER

- Regional expansion beyond India
- More languages from the same catalog

Seeking design-partner families and early-stage investors who believe the household is the next operating system.
